

Project Planification

For the management of the project the Monday tool was used.

The boards were defined: Backlog, Sprint, Doing, Done and Stretch.

Priorities and Dates were established. In addition, documentation can be attached with details of each requirement.

The screenshot shows a Monday.com project board for a project named 'Propylon'. The board is organized into three columns: 'Sprint', 'Doing', and 'Done'. Each column contains a table of tasks with columns for 'Item', 'Person', 'Status', 'Date', and 'Priority'. The 'Sprint' column has one task: 'Documentation: Control Swagger Documentation' assigned to a person, with a date of '14 Jul' and a priority of 'Medium'. The 'Doing' column has one task: 'Documentation: Sphinx Documentation' assigned to a person, with a date of '17 Jul' and a priority of 'Medium'. The 'Done' column has six tasks, all marked as 'Done', with dates ranging from '12 Jul' to '13 Jul' and priorities of 'High', 'Medium', 'High', 'High', 'Low', and 'High'.

Item	Person	Status	Date	Priority
Sprint				
Documentation: Control Swagger Documentation	[Person]		14 Jul	Medium
Doing				
Documentation: Sphinx Documentation	[Person]	Doing	17 Jul	Medium
Done				
Make plan to work on Monday	[Person]	Done	12 Jul	High
Models: Design and Implement	[Person]	Done	12 Jul	Medium
Upload file on DRF	[Person]	Done	12 Jul	High
Download files on DRF	[Person]	Done	12 Jul	High
Users Management	[Person]	Done	13 Jul	Low
Make and Implement Permissions	[Person]	Done	13 Jul	High

Frontend

On the Login screen, root url, enter the username and password created in Django (it can be the root user). You will be redirected to the file list.

In the upload form enter the desired URL to upload the file and select a file from your computer.

The files corresponding to the logged in user are listed on the same screen. By clicking on the file box you can download it.
